Safer with AmberGO

Avoid the risk of coronavirus infection - use an automated system

Due to dynamically changing situation in the country related to the growing number of cases of coronavirus

AmberOne A1 Motorway recommends **using the AmberGO** system, which is the most safe method of payment for a passage of the A1 Motorway, because it **does not require contact with another person** and does not require the submission of money or a card to collectors. We would like to remind you that **AmberGO works on all gates** and all interchanges regardless of the current epidemiological situation and regardless of the restrictions introduced, which aim to reduce the risk of spreading the virus.

In the current circumstances using AmberGO makes sense even in the case of individual motorway journeys. Joining the system is as easy as resigning from it, and the money of the user using AmberGO is safe on the card.

Safety first. Use AmberGO!
