

Press Release

Data / Date:
15/12/2020

Already every fourth vehicle on AmberOne uses the AmberGO system

By now 18 months have passed since the launch of the AmberGO automatic payment system. During that time **410,438 vehicles** were registered in the system and the number of automatic transactions at the end of November 2020 reached **25%** of the total. At some interchanges the number of transactions with AmberGO even exceeds 40%! This is very encouraging and if this trend continues during the holiday season gates dedicated exclusively to automatic payments will not have to be switched to mixed mode during increased traffic. Remember: the effectiveness of the system depends on its popularity among drivers.

We are constantly expanding the AmberGO system, making efforts to make it easily accessible, user-friendly and intuitive. The system is now available directly in our **AmberOne** application. You can also join the system using external payment applications: **Autopay** and **SkyCash**. The system can also be joined through a number of banking applications: **IKO**, **Bank Millennium**, **EnveloBank**, **PeoPay**, **Alior Bank** and **Moje ING mobile** and in the application **Yanosik**.

The analysis of behavior at the plazas and the results of a survey conducted among drivers indicated a need to introduce modifications to the marking of the lanes at the plazas. In order to meet the expectations, we are changing the marking of the exit and entry lanes dedicated only to the AmberGO system. These lanes will henceforth be **marked with the "camera" symbol, the word "only" and the AmberGO sign**.

We hope that the change will improve the understanding of the marking and a decrease in the number of drivers incorrectly entering and blocking the gates dedicated exclusively to AmberGO. The "camera" symbol as a designation of the lanes handling automatic payments is also used on other motorways in Europe. We also remind AmberGO users that the **system works at all AmberOne A1 Motorway lanes** - not only at dedicated lanes.

Example of the new signage.
